

# Radio Frequency LC- Meter FSV-01

Precision Induttance / Capacitor Measurement Instrument

## General Description

The LC/Meter model FSV-01, is a new model and new technologies concept of integrated Module without adjustments for Measurement L/C System

It show stable electric characteristics thanks to the use of Risonator Internal Oscillator and appropriate Design

## Applications

- Electronic Laboratory
- Quality Control Box
- Engineering Desk
- Project Manager
- CQ Materials Incoming Inspection
- RF Designers Office

## Dimension

**150 x 90 mm only**

**SMD Probe on request**

**All Italy Made**

## Features

- Very Small Dimension
- Battery Internal Powered
- Zero Auto Switch
- Automatic Range
- No external components
- Precision of 1% and 0,1 pF or +/-10nH
- Optional External Power Supply  
Standard 12 Volt
- Large Measurement Range from 1 pF to 470nF  
and from 10 nH to 10 mH
